

GRAPHUS

for G-Suite

Activation Guide

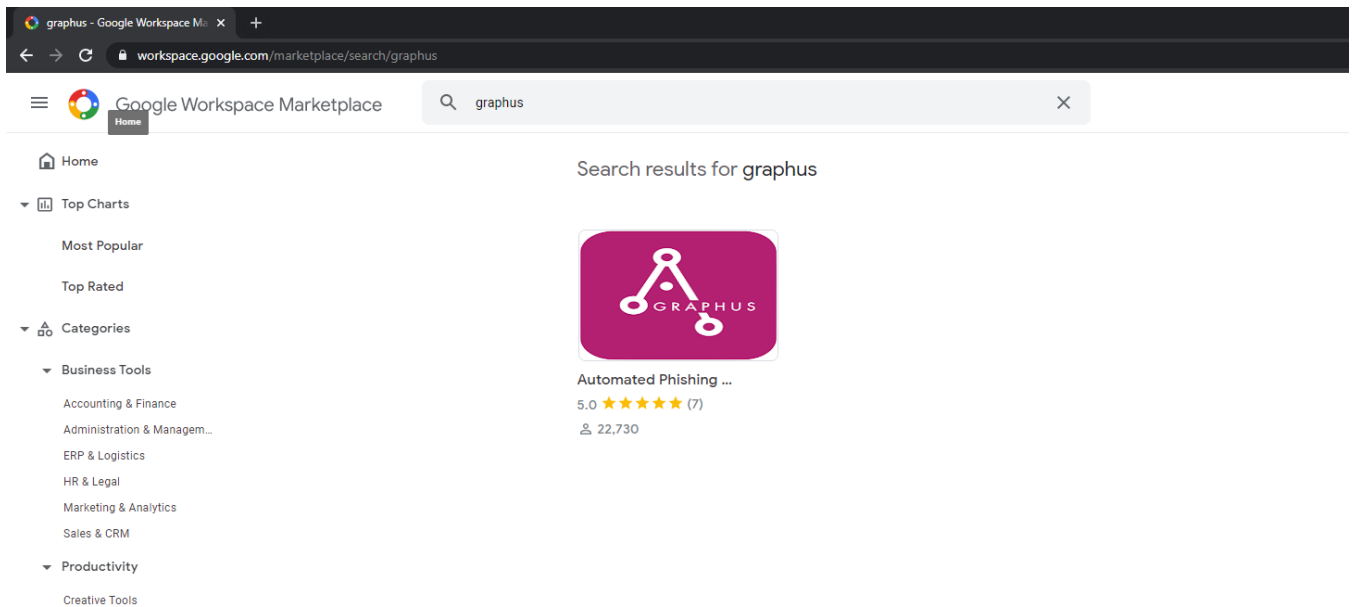

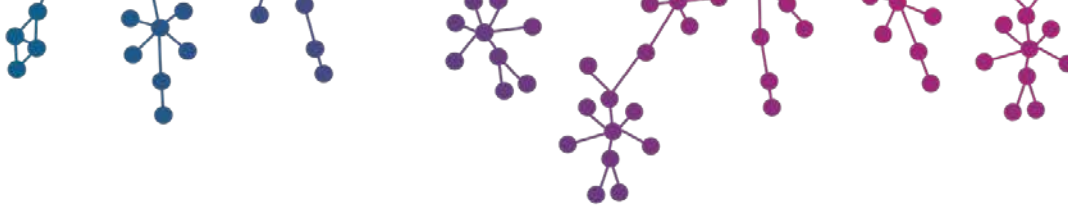

Graphus Application Activation

The activation process has to be carried out by the Super Administrator of the organization.

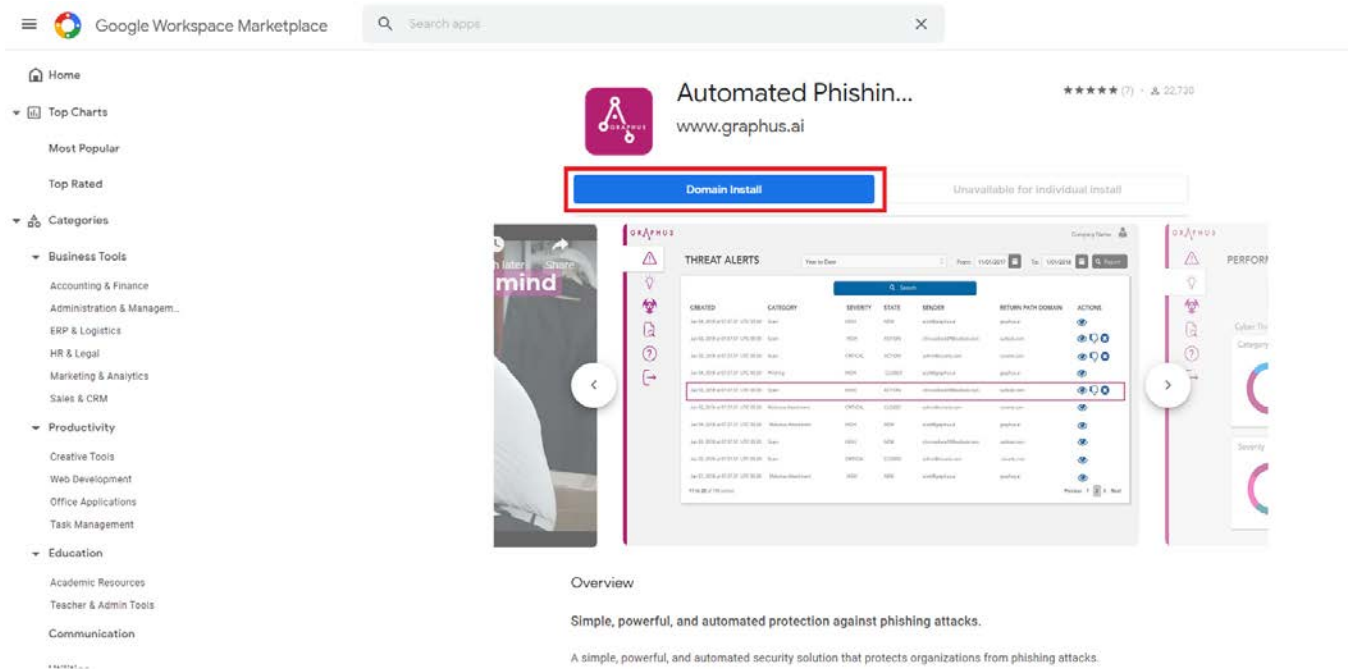

Steps

1. Open G-Suite Marketplace and search for **Graphus**. It will show up with the name **Automated Phishing Defense**.

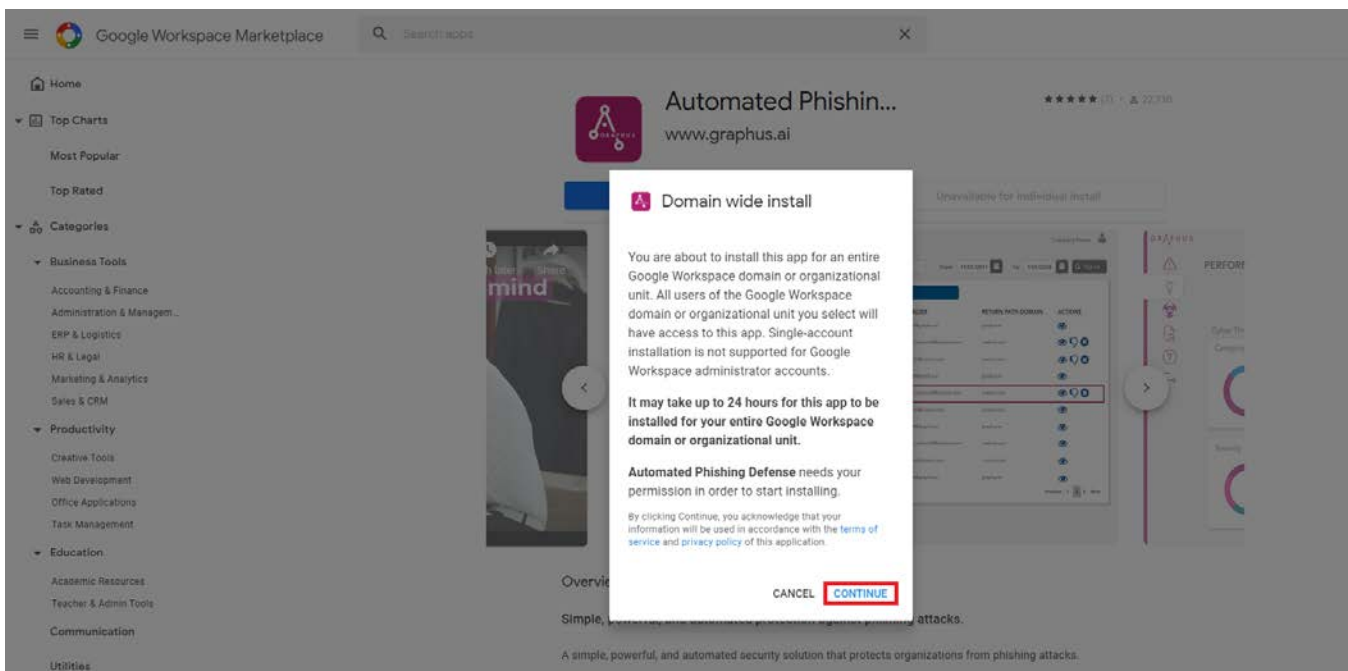

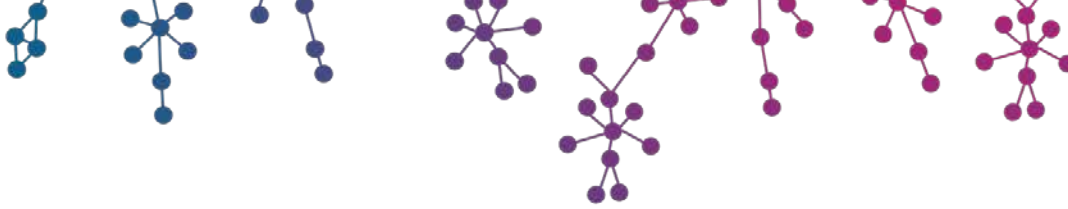

2. Select it and click **Domain Install**. A popup will appear for domain-wide installation.

3. Click **Continue**.

4. In the next popup window, check the box to agree to the Terms of Service and Privacy Policy, then click **Allow**.

You are granting **Automated Phishing Defense** the right to access your data:

- View your email address i
- See your personal info, including any personal info you've made publicly available i
- View and manage group subscriptions on your domain i
- View and manage your data across Google Cloud Platform services i
- View and manage the provisioning of groups on your domain i
- View usage reports for your G Suite domain i

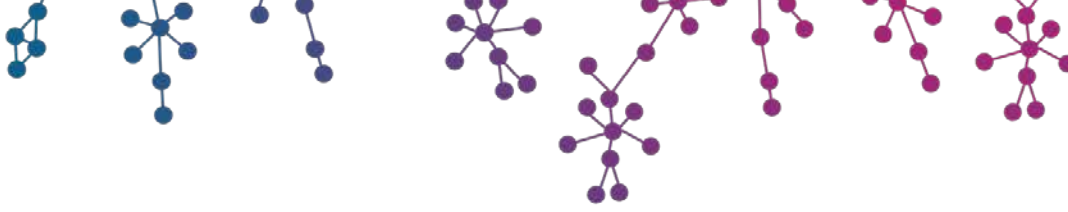

Turn ON for:

.com ▼

CANCEL

ALLOW

5. Click **Done**.

The screenshot shows the Google Play Store page for the app 'Automated Phishing Defense' by Graphus. The app has a 5-star rating from 7 reviews and 22,730 users. A white dialog box is centered on the screen, displaying the following text:

Automated Phishing Defense has been installed!

Where to find Automated Phishing Defense

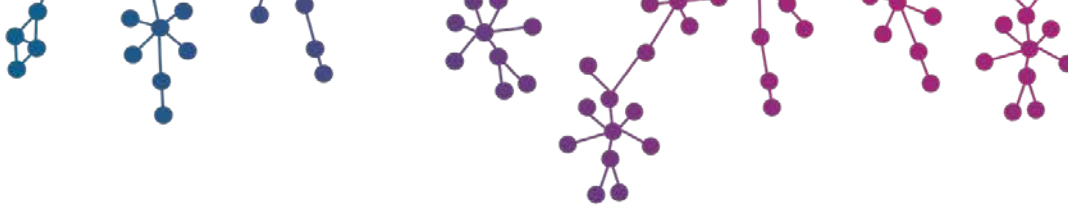

You can find Automated Phish... under the Apps launcher icon:

The dialog box also features a red-bordered button labeled 'DONE' at the bottom right.

Simple, powerful, and automated protection against phishing attacks.

A simple, powerful, and automated security solution that protects organizations from phishing attacks.

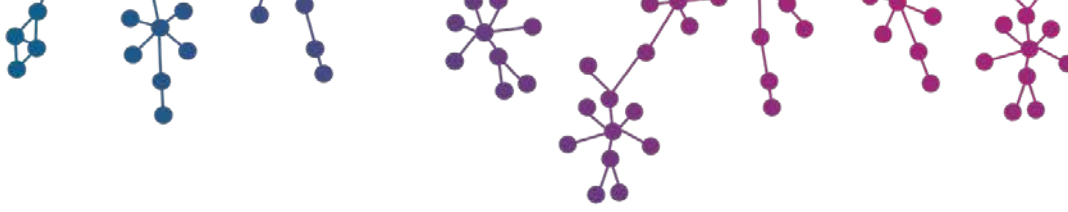

Free 14-day trial, no strings attached! Pricing starts at \$3/user/month. No credit card required.

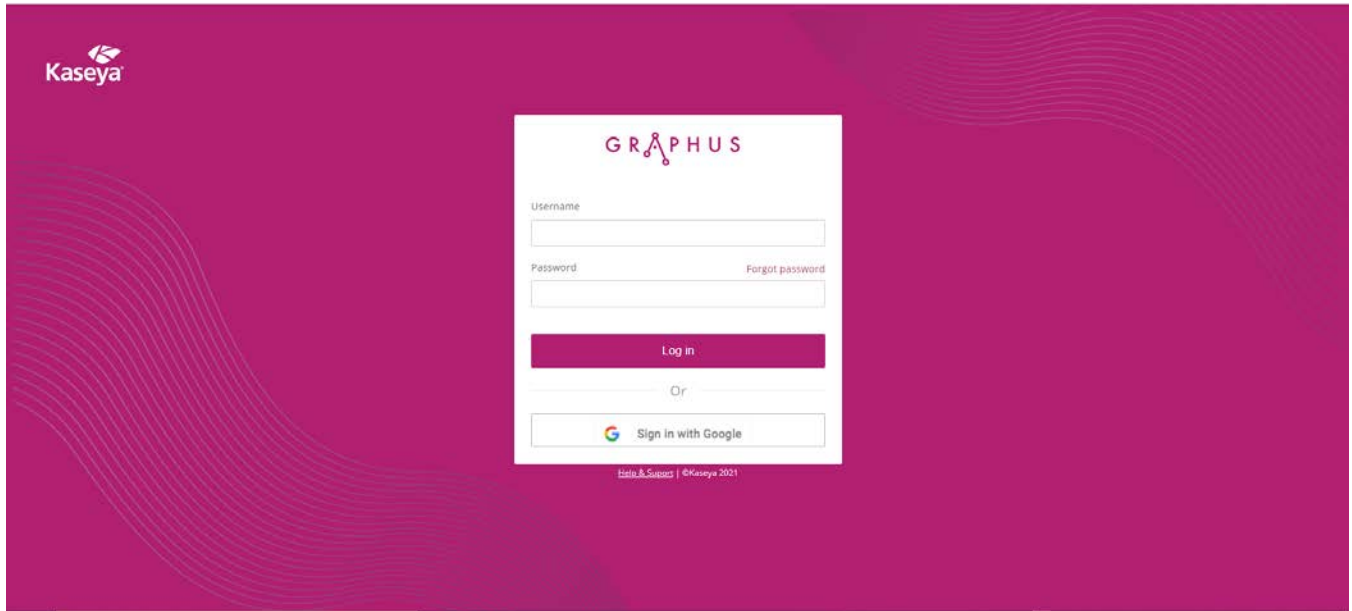

6. Now the application is installed. Click **Google Apps** icon and scroll down to find the installed application. Select **Automated Phishing Defense**.

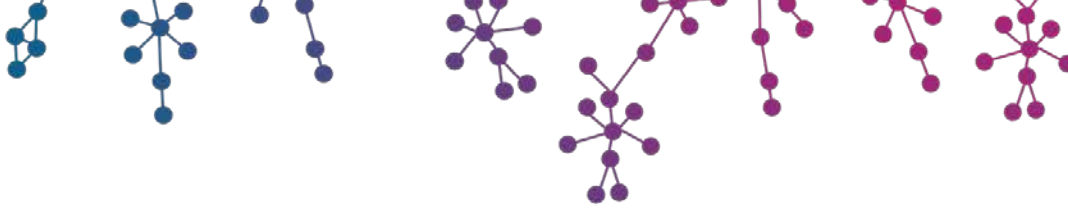

The screenshot shows the Google Play Store interface for the 'Automated Phishing Defense' app. The app is listed with a 5-star rating and 22,730 reviews. Below the app listing, there is a preview of the app's interface, which includes a 'THREAT ALERTS' table. The table has columns for 'CREATED', 'CATEGORY', 'SEVERITY', 'STATE', 'SENDER', 'RETURN PATH DOMAIN', and 'ACTIONS'. The table contains several rows of data, with one row highlighted in red. Below the table, there are navigation options for 'Overview', 'Simple, powerful, and automated protection against phishing attacks.', and 'A simple, powerful, and automated security solution that protects organizations from phishing attacks.'

7. You will be redirected to Graphus login page (<https://cloud.graph.us/selectlogin>). Click **Sign in with Google**.

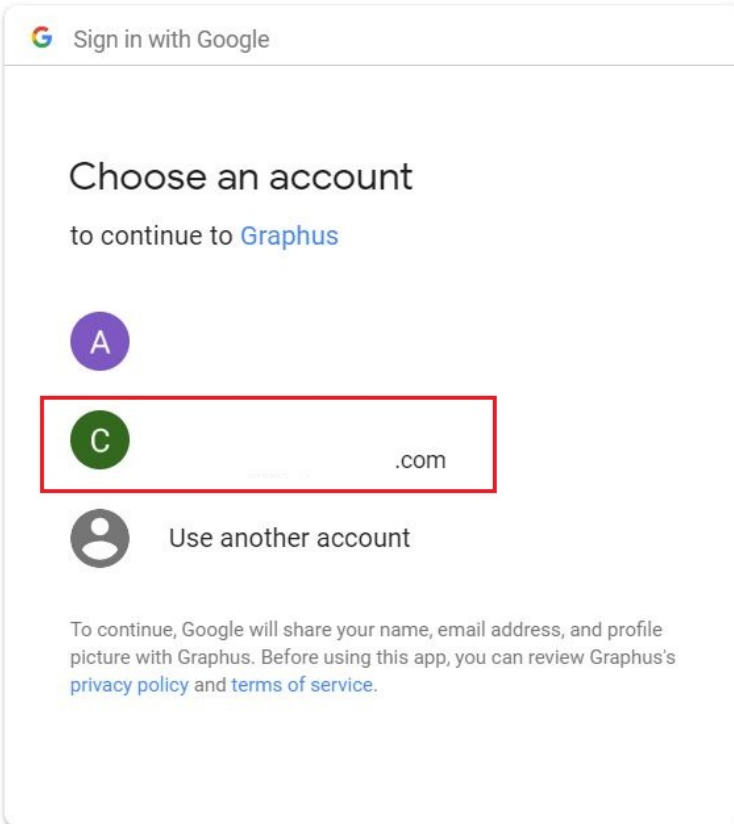

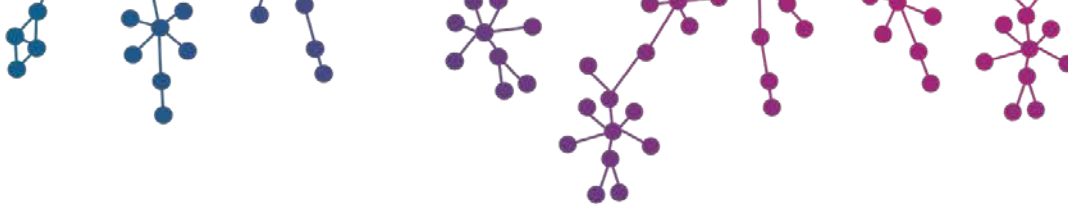

- Here you will have to choose the region where you want to store your data. If you want to store your data in the US region, choose **North America** or if you want to store your data in Europe region, choose **Europe/Middle East/Africa**.

The screenshot shows a white dialog box centered on a dark purple background. At the top of the dialog is the Graphus logo. Below the logo is the text "Please choose a region for data storage" followed by a horizontal line. There are two rectangular buttons: the top one is labeled "North America" and the bottom one is labeled "Europe/Middle East/Africa". Below the buttons is the text "OR". At the bottom of the dialog is a link for "Help & Support" and the copyright notice "©Kaseya 2021".

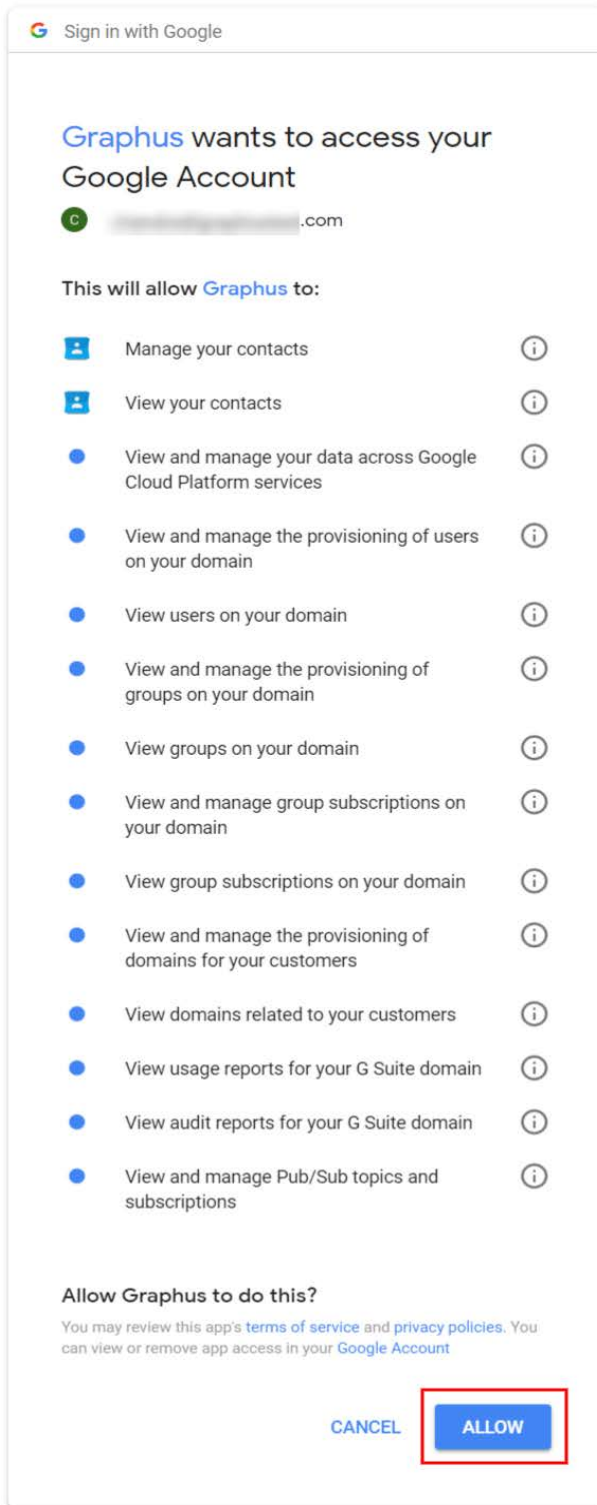

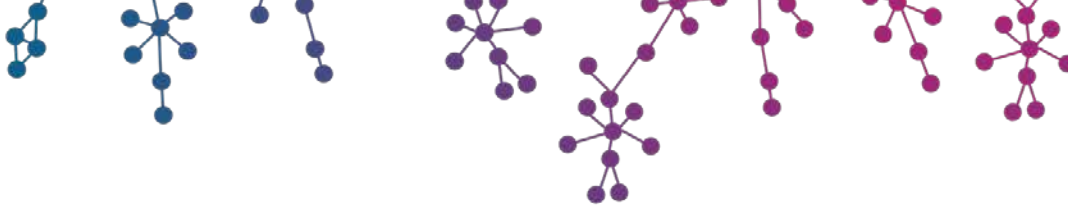

9. Select your G-Suite admin account to log into the portal.

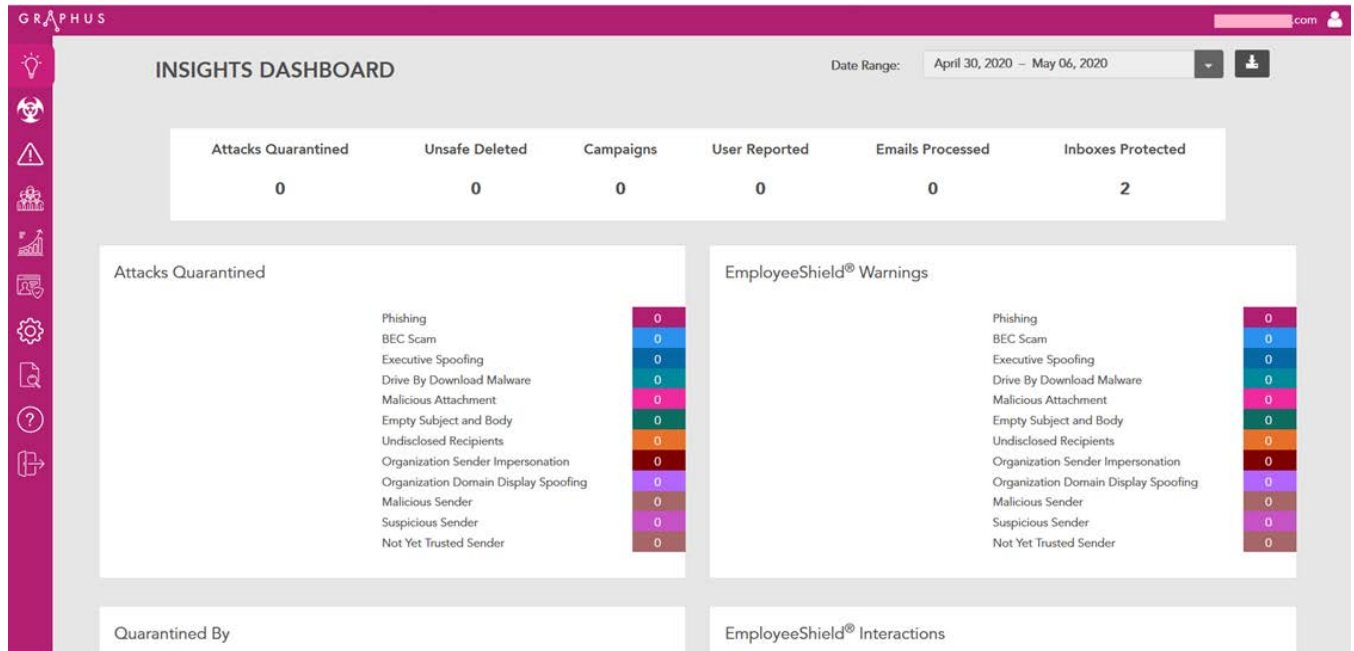

10. This will trigger a popup window which will ask for some permissions. Click **Allow**.

11. Now you will be able to see the Gaphus portal.
